

Universität St.Gallen

Postdoctoral Researcher (75%)

In Labour/Education/Health Economics

Starting from August 1, 2024, or upon mutual agreement

The Chair of Prof. Beatrix Eugster, at the Department of Economics at the University of St. Gallen (Switzerland) invites applications for a postdoctoral position in empirical labour, education, or health economics. The appointment is for 3 years and an employment level of 75%.

The position

The successful candidate will collaborate with Beatrix Eugster in joint research projects and conduct his or her own independent research. Furthermore, the candidate will be expected to provide some teaching support and assist in the supervision of PhD students.

Your profile

The successful candidate will have a strong background in applied econometrics (causal inference). Ideally, the candidate will be interested in questions concerning inclusive education, labour market consequences of intra-family health shocks, or evaluation of health innovation.

The candidate should have good user knowledge of R and/or Stata. To qualify for the position, candidates must have completed their PhD by the time of starting the position.

We offer

The Department of Economics offers a stimulating research environment with easy access to faculty members, competitive terms and conditions, and access to research support.

Application

Applications should be sent via email to beatrix.eugster@unisg.ch. They should include a cover letter, CV, a research statement, and a job market paper. Applicants should have two letters of recommendation sent directly by the letter writer via email to beatrix.eugster@unisg.ch. The application deadline is April 1, 2024. Applications will be evaluated continuously until the position is filled. We strongly recommend applying before February 12, 2024.

Interviews will be conducted online.
